

EL Multi-Student Monitoring Template User Guide

[EL Multi-Student Monitoring Template \(N.D.\) REVISED \(May 2021\) Blank.xlsx](#)

This spreadsheet is intended to allow users to track individual and whole group student progress on the ACCESS for ELLs 2.0 Composite assessment over time (developed by [WIDA](#)). Users have the opportunity to input student scores on the ACCESS assessment for each grade level they take the assessment and run a report for individual student progress over time. Based on the ACCESS 2.0 assessment there are 6 levels of English proficiency which include:

- 1.0 – 1.9 = Entering
- 2.0 – 2.9 = Emerging
- 3.0 – 3.9 = Developing
- 4.0 – 4.9 = Expanding
- 5.0 – 5.9 = Bridging
- 6.0 = Reaching

The Monitoring Template is quite large so this guide will break apart each section explaining what is included and what is editable by users.

Student Level Data – Columns A – M

The **Student Level Data** worksheet is the worksheet in which users will input **student names** (Column A), **baseline ACCESS test school year** (Column C), and **ACCESS Test scores** (covered in later sections).

NOTE: The only columns that need to be edited by the user of the document are columns in **beige**.

	A	B	C	E	F	G	H	I	J	K	M
1	Student ACCESS 2.0 Assessment Monitoring Template										
3	Instructions: Please only fill in data in the columns that are shaded in beige. The rest of the fields will auto calculate.

CANNOT
edit
these
columns

Columns A & C (EDITABLE)

Users will need to enter in student names (or ID#s) as well as the first (i.e. baseline) school year in which each individual student took the ACCESS assessment.

Columns E- M (NOT EDITABLE)

The rest of the information in Columns E – M will automatically populate based on data that users enter into the student data table (which will be covered shortly). The **Current Grade Level** is calculated by taking the student’s most recent ACCESS assessment grade level, and adding one grade level. The **Baseline ACCESS 2.0 Composite Score** represents the ACCESS score for the earliest grade level inputted into the student data table, as well as the **Baseline Grade Level** represents the grade level in which the earliest ACCESS score is entered in the student data table. The **Most Recent Assessment = Baseline** column identifies if the student only has one ACCESS test score logged in the table (“Yes”) or if the student has multiple ACCESS scores (“No”). The **Expected # of Years to Achieve Proficiency and Expected Grade to Achieve Proficiency and Expected School Year to Achieve Proficiency** columns are calculated based on the expectations for EL student growth by each state (see images below). Based on these recommendations, the expected number of years to become proficient is automatically added to each student’s baseline ACCESS grade level to identify at what grade level and school year they should become proficient. Lastly, the **Student Score at Expected Proficiency Grade Level** column will automatically populate with the score the student received (based on data entered in the student data table), and it will be in green if it is at/above 5.0 (the score needed to achieve proficiency) or red if below 5.0.

NORTH DAKOTA	
Baseline ACCESS 2.0 Composite Score	Expected # of Years to Become Proficient
1.0-1.9	6 Years
2.0-2.9	5 Years
3.0-3.9	4 Years
4.0-4.9	3 Years
5.0-6.0	2 Years

SOUTH DAKOTA	
Baseline ACCESS 2.0 Composite Score	Expected # of Years to Become Proficient
1.0-1.9	5 Years
2.0-2.9	5 Years
3.0-3.9	4 Years
4.0-4.9	3 Years
5.0-6.0	0 Years

Student Level Data – Columns N - W

NOTE: The only data that need to be edited by the user of the document are columns in **beige**.

ONLY thing that **CAN** be edited

This section of columns addresses student data from three different vantage points; 1) the student’s **most recent assessment data** (Columns N – Q); 2) the student’s **prior year assessment data** based on the school year selected (Columns R- T); and 3) the students’ **selected year assessment data** (Columns U – W).

Columns N – Q (Most Recent Assessment Data) (NOT EDITABLE)

This data pertains to the data from each student's latest ACCESS assessment data entered in the student data table. Column N identifies the grade level in which it occurred and Column O identifies what the student's score was on the ACCESS assessment. The student's expected score for that time period (based on linear growth from baseline access score to the grade in which they are expected to become proficient) is included in Column P. If the student's actual score is below their expected score it will show up as **red**; if it is at/above their expected score it will show up **green**. If the student's most recent assessment is their baseline score, the score will show up in **grey**. Lastly, Column Q identifies the school year in which the most recent ACCESS assessment was taken.

Columns R – T (Prior Year Assessment Data Based on School Year Selected) (NOT EDITABLE)

This data pertains to previous year's student ACCESS assessment data based on the School Year Selected (Cell U4). Users are able to go back in time and compare students' growth from their prior school year. Column R calculates which grade each student was in during the previous year, based on the school year selected. Column S identifies the student's prior year assessment score. If the student's prior score is below their expected score for that year it will show up as **red**; if it is at/above their expected score it will show up **green**. If the student's prior year assessment is their baseline score, the score will show up in **grey**. If the student was active (i.e. their baseline score occurred in a grade prior to the prior score AND they hadn't previously moved), but they did not have a score it will show up as **Missing**. If the student's baseline score occurred after their prior year school year it will show up as **Not Active**.

Columns U – W (Selected Year Assessment Data) (NOT EDITABLE)

This data pertains to student ACCESS assessment data based on the School Year Selected (Cell U4). Users are able to go back in time and look at students' scores from a prior school year. Column U calculates which grade each student was in during the selected school year. Column V identifies the student's selected year assessment score. If the student's score is below their expected score for that year it will show up as **red**; if it is at/above their expected score it will show up **green**. If the student's assessment score is their baseline score, the score will show up in **grey**. If the student was active (i.e. their baseline score occurred in a grade prior to the prior score AND they hadn't previously moved), but they did not have a score it will show up as **Missing**. If the student's baseline score occurred after the selected school year it will show up as **Not Active**. If the student previously moved or graduated (even during the selected school year) it will show up as **Prev. Moved/Grad.** If numbers show up in **orange** that means that the student's score decreased or did not change from the previous year's assessment.

Tables & Graphs Worksheet

The **Tables & Graphs** worksheet is intended to portray whole school data for a **single year in time**. The year that is selected is chosen from **the Student Level Data** worksheet in Cell V4.

NOTE: No data is editable on this entire worksheet

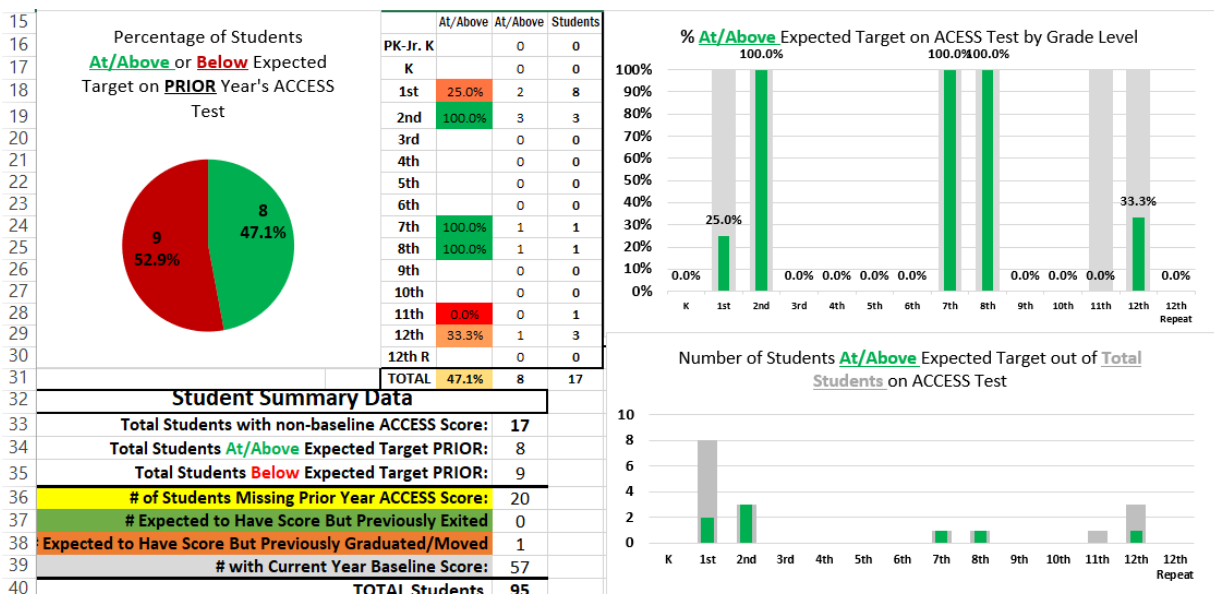

Columns A – Q / Rows 1 – 13 (NOT EDITABLE)

This section of the document includes a grade-level breakdown of the number of students at/above expected target, below expected target, at baseline, who are missing data, and who have previously exited or previously moved or graduated.

	A	B	C	D	E	F	G	H	I	J	K	L	M	N	O	P	Q
1	School Year	CURRENT Grade Level															
2	2017-2018	Pre-K Jr. K	K	1st	2nd	3rd	4th	5th	6th	7th	8th	9th	10th	11th	12th	12th Repeat	TOTAL
3	% At/Above Expected Target			25.0%	100.0%					100.0%	100.0%			0.0%	33.3%		47.1%
4	# At/Above Expected Target	0	0	2	3	0	0	0	0	1	1	0	0	0	1	0	8
5	# Below Expected Target	0	0	6	0	0	0	0	0	0	0	0	0	1	2	0	9
6	Total Expected to Have ACCESS Score	0	12	23	18	11	7	1	1	3	3	3	3	5	5	0	95
7	Total Students with ACCESS Test Score	0	12	22	15	11	7	1	0	1	1	0	0	1	3	0	74
8	Total Students with non-baseline score	0	0	8	3	0	0	0	0	1	1	0	0	1	3	0	17
9	# Baseline Score	0	12	14	12	11	7	1	0	0	0	0	0	0	0	0	57
10	# Previously exited	0	0	0	0	0	0	0	0	0	0	0	0	0	0	0	0
11	# Previously graduated/moved away	0	0	0	0	0	0	0	0	1	0	0	0	0	0	0	1
12	# Missing ACCESS Score	0	0	1	3	0	0	0	1	1	2	3	3	4	2	0	20
13	# Scores After Expected Proficiency Date	0	0	0	0	0	0	0	0	0	0	0	0	0	0	0	0

Columns A – Q / Rows 15 – 40 (NOT EDITABLE)

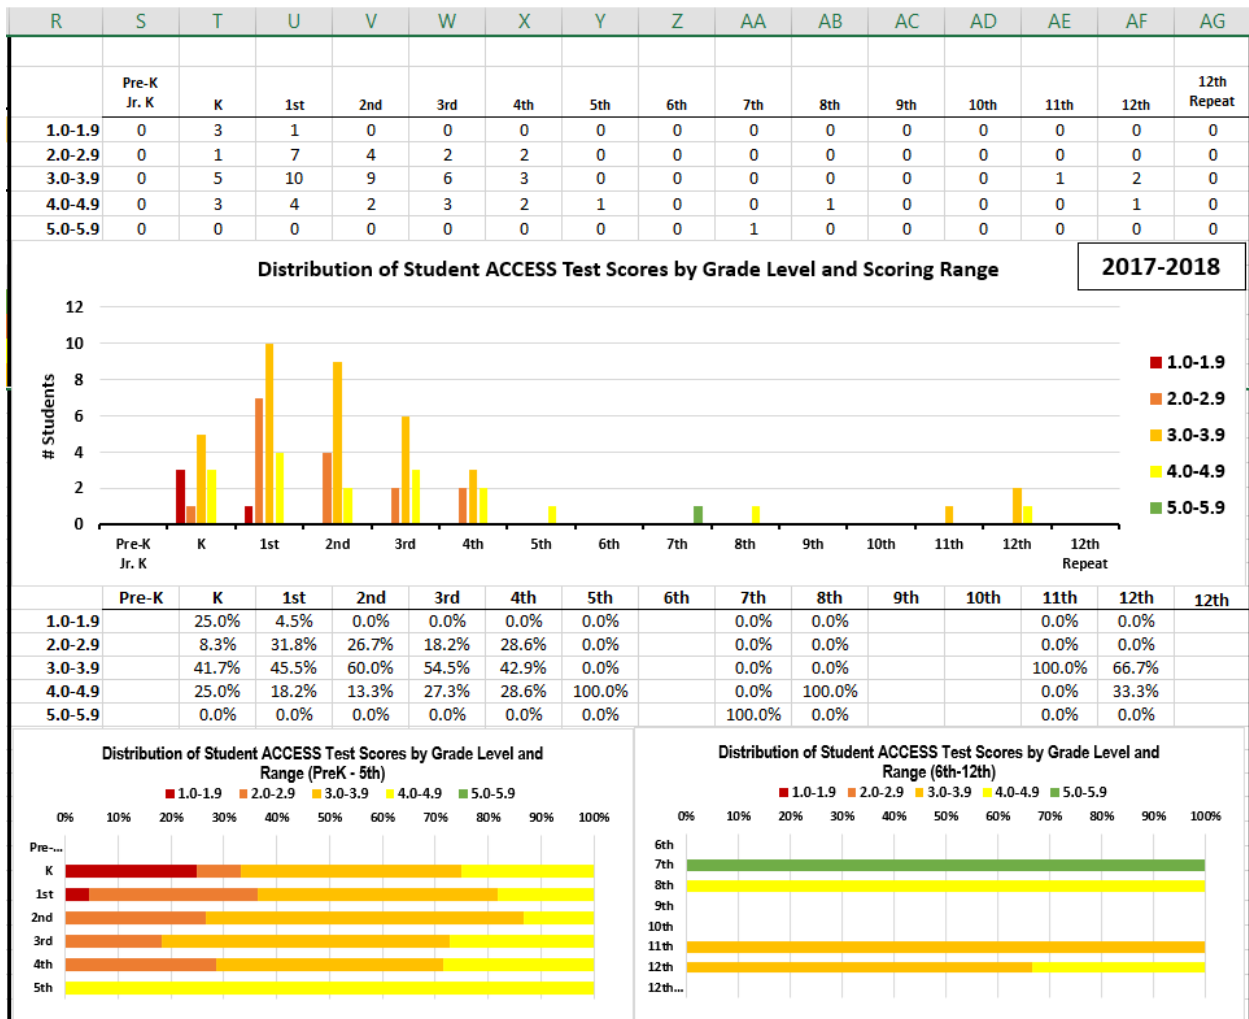

This section shows the overall breakdown of the percentage of students at/above and below their expected target during the selected school year (pie graph). The column charts at the right display the percentage of students at/above expected target during the selected year by grade level (top), and the total numbers of students at/above expected target by grade level (bottom). The bottom left provides an overall summary of student data for the selected year.

Columns R – AG / Rows 1 – 40 (NOT EDITABLE)

This section provides a grade level breakdown of the distribution of the total number of students within each ACCESS category (top graph), and the distribution of the percentage of students within each ACCESS category by grade level (bottom graphs).

Looking at the bottom graph we see that over 20% of the Kindergarten group is between the 1.0 – 1.9 ACCESS score range. However, looking at the top chart we see that this represents only 3 students. A majority of students in each grade fall within the 3.0 – 3.9 range or the 4.0 – 4.9 range.

Individual Student Graph Worksheet

NOTE: The only editable cell in this worksheet is **Cell C2**

This worksheet allows users to pull the progress chart for an individual student. In order to select an individual student one must refer to the “ID” column (Column B) from the **Student Level Data** worksheet. Find the student of interest on the **Student Level Data** worksheet and make note of their ID number. Then select that corresponding ID number on the **Individual Student Graph** worksheet in the yellow cell (C2). Their ACCESS assessment score history should populate the tables above and below the graph, and the graph should change to match those numbers. Similar to the other worksheets, the grey circle represents their baseline score. The **solid black line** represents that student’s expected rate of growth to be proficient by their expected grade level (according to the state guidelines). The dashed grey line represents the student’s progress each year. A **red circle** means that their ACCESS assessment score was below their expected growth target. A **green circle** means that their ACCESS assessment score was at/above their expected growth target. An **orange circle** means that their ACCESS assessment score was at/above their expected growth target, but decreased or did not change from their previous year.
